ORR Economic Intelligence Report to PACOM

RE: () - (CHECK "X" ONE)

MARKED FOR INDEXING

NO INDEXING REQUIRED

None; for your information

INDEXING CAN BE JUDGED BY QUALIFIED HQ DESK ONLY

1. The following report is submitted by [redacted] 25X1A9a following three months duty at Honolulu to indicate to *ORR* the use made of finished economic and geographic intelligence reports and the potential that exists for additional assistance to PACOM components.

2. ARPAC responsibilities are such that they engage in a scheduled research program that frequently draws on a variety of finished intelligence reports, primarily involving geographical studies, and transportation and communications. They also are constantly seeking material for OB and OW reports. Their FY-1961 research program includes, among other things, the following:

- a. Update of military defense and operations plans for
 - (1) Southeast Asia
 - (2) Taiwan
 - (3) South Korea
 - (4) Indonesia
 - (5) Japan
- b. Across the board Southeast Asia transportation study.
- c. Routes and logistic capabilities South of the Communist China border.
- d. Strategic Vulnerability Surveys for Southeast Asia, Indonesia, Taiwan
- e. OW studies for about 12 localities, including Hue-Tourane and Khorat.
- f. Reports summing up Communist China's electronics industry and Munitions Industry.
- g. Urban intelligence reports (Power plans, etc.) for:

(1) Communist China:

Chengtu	Nanking	Chinan
Hofei	Shanghai	Paoching
Kiangchow	Taipei	Tsaoching
Nanching	Wuhan	Hubei
		Peiping

(2) Eastern USSR:

Kholmak	Ufa	Angarsk
Koremskov	Vokhobov and	Bolinsk
Kostromskoye	Leontovsk	Arva
Nakhodka	Tushro-Sakhalinsk	Novinsk
Olkhovatsk	Yakovlev	Sverdlov-Kurila
		Ust-Lena

3. PACFLT basic research program is largely confined to their geographic intelligence reports (GIR) for which we are providing supplies register material and information on industrial facilities and transportation.

CONTINUATION OF
DISPATCH

DISPATCH 25X1A6b

4. PACAF's chief research effort is targeting, and as industrial targeting is accomplished at a higher level, their interests are specifically military targets, including occasional transportation and communication centers.

5. The *DRR* project initiation memo and the future research program as outlined in H.RP FY-61 are helpful in pointing out the direction of current *DRR* research. We also find the CSR and GMR are particularly useful to PACAF components.

6. Serial publications of *OCI*, which include current economic intelligence, plus field reports, largely meet the needs of PACAF commanders for daily information on which to base their briefings. Our role, in addition to dissemination, includes interpretation of items on request and the supplying of additional background materials, chiefly based on our files of previously published intelligence or our own knowledge derived from past substantive responsibility. Our library also provides a useful storehouse for researching to service detailed queries in the command field by CINCPAC analysts and the component commands.
